

FOREST PARK ZOO

We are planning a trip to Forest Park in Springfield, MA parents and children. The zoo is a part of Forest Park, a 735-acre woodland park and features exotic and indigenous animals representing a large variety of species found throughout the world and in North America. Llamas, bears, birds, camels, farm animals and more make the Forest Park Zoo their home. There is also a small train available for rides around the park.

Transportation is not included and we recommend you travel in a caravan or carpool. I will provide directions. There is also a \$5/car admission to the Park.

Once at the zoo, you will enter at one time. Departure from the zoo is at your convenience.
